AN INTEGRATED M&E FRAMEWORK FOR FRESHWATER CONSERVATION AND WASH
AGENDA

1. Welcome, Kristen Walker Painemilla, Conservation International

2. Introduction to ABCG, Jocelyn Ziemian, ABCG Coordinator

3. Welcome from USAID, Tim Resch, USAID Bureau for Africa, Office of Sustainable Development

4. Presentation of the M&E Framework, Janet Edmond and Brittany Ajroud, Conservation International

WHY INTEGRATE?

Our Theory of Change is that integration of freshwater conservation and WASH approaches can:

• promote improved human health, education and economic growth
• protect the environment
• contribute to sustainable development
INTEGRATION GUIDELINES

The guidelines include a set of **core guiding principles** as critical elements to consider before developing and implementing integrated projects and the **primary steps** needed to design integrated WASH and freshwater conservation interventions.
WORKSHOP PARTICIPANTS

More than 26 health, development and conservation experts from Kenya, Malawi, Rwanda, Tanzania and Uganda contributed technical advice and strategic inputs.
GOAL: Improved human well-being and ecosystem health

SO: Increase access to and use of WASH products and services integrated with the ability of an ecosystem to sustain these services

IR 1: Increase first time and improved access to sustainable water supply
IR 2: Increase first time and improved access to sanitation
IR 3: Increased adoption of key hygiene behaviors
IR 4: Improved governance of water resources
IR 5: Improved freshwater ecosystem functionality
IR 6: Enhanced integrity of terrestrial and freshwater biodiversity

% of households with access to improved drinking water source

# of reported incidences of water borne diseases

% of native vegetative cover distribution and abundance of invasive species
GOAL: Improved human well-being and ecosystem health

SO: Increase access to and use of WASH products and services integrated with the ability of an ecosystem to sustain these services

IR 1: Increase first time and improved access to sustainable water supply
IR 2: Increase first time and improved access to sanitation
IR 3: Increased adoption of key hygiene behaviors
IR 4: Improved governance of water resources
IR 5: Improved freshwater ecosystem functionality
IR 6: Enhanced integrity of terrestrial and freshwater biodiversity

VALUE ADDED refers to advantages and additional programmatic results as a result of the integrated freshwater conservation and WASH approach

COMMUNITY CAPACITY
GENDER
PEACE + PROTECTION
YOUTH
GOVERNANCE + POLICY
HAVE SUGGESTIONS FOR IMPROVEMENT? THERE IS AN OPEN COMMENT PERIOD UNTIL OCTOBER 10th. PLEASE EMAIL csorto@conservation.org
PUTTING THE FRAMEWORK TO USE

- Explore potential to **pilot test** the guidelines and framework in the field
- Develop an **indicator guide**
- Other ideas?
